Nguyễn Tú Anh

AI Engineer

31/07/2004 | 0981869218 | anh.nt.004@gmail.com

Female | Ha Noi

OBJECTIVE

AI Engineer with a strong foundation in Machine Learning and Deep Learning, focused on designing, training, and deploying AI models for real-world applications, and continuously improving model performance through data-driven solutions.

EDUCATION

10/2022 - 06/2026

University of Transport and Communications | Computer Science

GPA: 3.78/4.0

- Outstanding Academic Scholarship, 6 consecutive semesters (2025)
- Outstanding Student, University (2023)
- Outstanding IT Student, IT Department (2023-2024, 2024-2025)

WORK EXPERIENCE

12/2022 - 10/2025

UTC Lab | Teaching Assistant - Part-time

- Assisted students in learning algorithms, data structures, and C/C++ through guided problem-solving sessions
- Designed and graded programming assignments, focusing on algorithmic thinking and code quality
- Supported laboratory sessions and provided technical guidance to improve students' understanding

12/2024 - 9/2025

VIET NAM TECHNOLOGY TELECOMMUNICATIONS JOINT STOCK COMPANY | AI Intern

RAG-based Sales Chatbot

- Developed a multi-shop sales chatbot to automatically answer customer inquiries and support product recommendations.
- Implemented a Retrieval-Augmented Generation (RAG) pipeline to retrieve relevant knowledge from product catalogs, FAQs, and store policies.
- Built data processing workflows including data cleaning, embedding generation, and vector storage for efficient semantic search.
- Integrated Large Language Models (LLMs) to generate context-aware and shop-specific responses.
- Improved chatbot response accuracy and reduced customer support workload.

12/2023 - 12/2024

AI & ML Lab, UTC | Research Assistant - Part-time

- Researched and implemented machine learning and deep learning models for applied AI tasks

- Conducted experiments to evaluate model performance and compare different approaches
- Assisted in data preprocessing, model training, and result analysis
- Collaborated with team members to improve model accuracy and training efficiency

ACTIVITIES

2022 - 2025

SFIT - Information Technology Club | Academic Committee Member

- Designed algorithmic problem sets for faculty-level Informatics Olympiad competitions
- Taught algorithms and problem-solving techniques to club members
- Mentored club members in analyzing problems and optimizing algorithmic solutions

SKILLS

- Programming Languages: Python, C/C++
- Deep Learning: Neural Networks, Sequence Modeling, Attention Mechanisms
- LLM Foundations:
  - Understanding of Transformer architectures
  - Embedding-based text representation
  - Prompt design and optimization (foundational)
- Frameworks & Tools: PyTorch, TensorFlow, Scikit-learn, NumPy, Pandas, Git
- Machine Learning: Supervised & Unsupervised Learning, Model Training, Evaluation, and Error Analysis
- Natural Language Processing:
  - Transformer-based Language Models (PhoBERT)
  - Contextual Text Embeddings and Representation Learning
  - Text Classification and Text Preprocessing
- AI Systems:
  - End-to-end Machine Learning Pipelines
  - Model Inference and Performance Optimization
- Languages: English (B2 - technical reading & working communication)

CERTIFICATIONS

2023-2025	Certificate of Excellence, Informatics Club Activities (3 consecutive years)
2025	A+ Certificate, Applied Algorithms by Samsung
2022-2023	Certificate of Excellence, Youth Union and Student Movement

HONORS & AWARDS

2025	2nd Place – Faculty of Information Technology, UTC AI model for recognizing and understanding Vietnamese sign language
2024	1st Place – Faculty of Information Technology, Automated Domain Identification from Social Media Comments
2023	Third Prize of The 32nd Vietnam IT Student Olympiad

2023	Best Female Student, 20th Anniversary IT Department Competition
2023	Third Prize, The IT Clubs Freshman Code War
2023	First Prize, Algorithm Design Competition
2022	Third Prize, University-level Informatics Olympiad

PROJECTS

10/2024 - 05/2025

AI model for recognizing and understanding Vietnamese sign language | AI Engineer, Data Scientist (Team of 5)

- Developed a deep learning–based computer vision system for recognizing and understanding Vietnamese sign language
- Collected, labeled, and preprocessed 1,055 visual samples to build a high-quality dataset
- Designed and trained deep learning models for gesture recognition and visual sequence understanding
- Conducted experiments to evaluate model performance and analyze inference behavior
- Achieved 99.6% accuracy on the test dataset

Technologies: Python, MediaPipe, PyTorch, TensorFlow

10/2023 - 05/2024

Automated Domain Identification from Social Media Comments | AI Engineer, Data Scientist (Team of 5)

- Built an NLP-based machine learning system to classify content domains from Vietnamese social media comments
- Collected and preprocessed 10,000 text samples for supervised learning
- Applied transformer-based language models (PhoBERT) to learn contextual text embeddings
- Worked with sequence representations and contextual embeddings, forming a foundation for LLM-based systems
- Trained and evaluated multiple machine learning and deep learning models
- Achieved 87% accuracy on the validation dataset

Technologies: Python, PyTorch, Scikit-learn, PhoBERT

01/2025 - 05/2025

Resume recommendation | AI Engineer (Solo project)

- Developed an AI-driven resume recommendation system using machine learning techniques
- Collected and preprocessed 2,500 resumes and job descriptions
- Designed an end-to-end pipeline from data preprocessing to model inference
- Combined rule-based logic and machine learning models to generate recommendations
- Evaluated system performance using accuracy and relevance-based metrics
- Achieved 85% accuracy and a 0.72 relevance score

Technologies: Python, Scikit-learn

09/2025 - 11/2025

Market Basket Analysis for Product Recommendation and Marketing Support | AI Engineer, Data Analyst

- Applied unsupervised learning and data mining techniques to analyze transactional retail data
- Preprocessed and cleaned datasets for pattern discovery
- Generated association rules to support recommendation and business decision-making

Technologies: Python, Pandas, NumPy, Mlxtend, Matplotlib

INTERESTS

- Drawing, Photography, Traveling
