Bùi Lê Quang Hải

QUALITY ASSURANCE / TESTER

Dedicated Computer Science student seeking to contribute to software quality through professional Manual and API Testing. My goal is to master the STLC in an Agile environment and transition into an Automation Test Engineer, leveraging my programming background to build efficient automation frameworks and optimize product quality.

Skills

- Manual Testing
- API Testing
- Automation Testing: Selenium, Katalon
- Software Testing, Mobile Testing
- Bug Management: Jira, Excel, Google sheet
- Programming: Java, Python, C++
- Database: MySQL,SQL server, PostgreSQL
- Languages: English (B1 - technical reading & working communication)

Certifications

10/1/2025

Samsung A+ Algorithm Certificate (2025): Certified for advanced problem-solving and algorithmic skills

Work experience

Globits — 8/2024 - 10/2024

Intern

Tech Stack: Postman, Java Spring Boot, RESTful API, Swagger, Jira.
Project: Clinic & Hospital Information System (HIS), Sales & POS Management Software.
Responsibilities:
Analyzed complex business requirements for **healthcare workflows and retail sales modules** to design effective test scenarios.
• Performed **API Testing (Postman)** to validate Response Data, Status Codes, and JSON business logic for medical records.
• Conducted **Web & Mobile Testing**, focusing on UI/UX, cross-browser compatibility, and system integration.
• Executed Regression Testing and logged defects via **Jira** to ensure the stability of healthcare data processing.

FPT software — 10/10/2025 - 10/3/2026

OJT Tester

Tech Stack: SAP, AI Agents, Copilot Studio, Jira, MS Planner, Teams, PostgreSQL.
Project: SAP-based Bidding Management System & Enterprise AI Assistant (Office AI Agent).
Responsibilities:
Designed comprehensive Test Cases/Checklists for **SAP Bidding modules**, procurement workflows, and Admin dashboards.
• Performed Manual Testing on **AI-integrated features (Copilot Studio)**, ensuring response accuracy and NLP consistency.
• Validated data integrity and bidding logic between **SAP** backend and frontend interfaces using **PostgreSQL**.
• Managed bug lifecycle via **Jira/Excel** and collaborated in an **Agile/Scrum** environment using **MS Teams and Planner**.

Education

University of Transport and Communications (UTC) — 2022 - 2026

Computer Science

GPA 3.4

Projects

BillShare – Group Expense Manager 10/2025 - 11/2025

Backend dev , tester

Testing Tasks:
• Analyzed requirements and designed **Test Cases/Scenarios** for core features (Group creation, split bills, history).
• Performed **API Testing** for logic calculations and data validation.
• Conducted **UI/UX Testing** on web interfaces and managed bugs using **JIRA**.
• Executed **Regression Testing** at the end of each sprint.

Movie Ticket Booking Website 9/2024 - 11/2024

Backend dev, tester

Testing Tasks:
• Developed test cases for Transaction Safety, User Authentication, and Seat Selection.
• Executed Database Testing (SQL) to verify seat status updates and payment records.
• Verified responsive design across multiple devices to ensure a seamless booking flow.
